

Yashraj Nigam

Senior Associate, Data Science & Analytics

Bengaluru, Karnataka, India | +91 87709 0029 | y.r.nigam@gmail.com | linkedin.com/in/yrnigam | yrnigam.blogspot.com

SUMMARY

Data Science and Engineering professional with over 6 years of experience designing and delivering cloud-native data platforms, enterprise ETL pipelines, and applied AI solutions. Skilled in Python, PySpark, and SQL for both structured and unstructured data, with hands-on expertise across AWS cloud services, data lake architecture, and machine learning. Experienced in building Generative AI solutions using RAG, LangChain, and large language models, and in using AI-assisted development tools to accelerate delivery. Proven track record of leading end-to-end feature architecture, mentoring engineering teams, and partnering directly with client stakeholders to deliver production systems on schedule.

SKILLS

Cloud Platforms:	AWS, Databricks
Cloud Services:	S3, EMR, Step Functions, Glue, Lambda, SNS, EventBridge, DataSync, AppFlow, Redshift
Databases:	Oracle, MySQL, Redis, Kafka, Elasticsearch, HBase
ETL Tools:	Talend (Open Studio and Enterprise)
Languages:	Python, PySpark, SQL, R
Generative AI / ML:	RAG, LangChain, Hugging Face, LLMs, OpenAI, LlamaIndex, Transformers, Scikit-learn, OpenCV
DevOps & Tools:	Git, GitHub Actions, CI/CD, JIRA, Confluence, Docker, Linux, Jupyter, VS Code, DBeaver
Visualization:	Tableau, Power BI

PROFESSIONAL EXPERIENCE

PwC India, Senior Associate, Data Science & Analytics

July 2024 - Present

Bengaluru, India

Client: Large US Pharmaceutical Enterprise

- Deliver secure, scalable AWS-based data platforms and production workflows using Python, PySpark, SQL, serverless AWS Lambda, GitHub Actions, and workflow orchestration.
- Lead end-to-end architecture for multiple features from scratch, now live in production, with strong CI/CD, monitoring, and industry-standard security practices.
- Mentor the engineering team each sprint and partner directly with US stakeholders to deliver on schedule.
- Use AI tools to accelerate code writing, generate test cases, and automate test execution.

KPMG India, Consultant, Data Science

November 2021 - July 2024

Gurugram, India

Project: Data Lake Development for a Leading Indian Automobile Brand

- Progressed from Associate Consultant, Data Engineer to Consultant, Data Science over two and a half years on the same engagement.
- Designed a configurable ingestion job that migrated 300+ tables from Oracle to a Data Lake and Data Warehouse using Talend, AWS Glue, and Amazon S3, reducing data processing time from 1 hour to 20 minutes.
- Integrated Talend with Python to improve data ingestion efficiency from networked shared drives to the Data Lake, using AWS Step Functions and EventBridge.

- Built an ETL job from scratch for Oracle-to-Oracle data replication, implementing conditional checks and stored procedure calls.
- Conducted a proof of concept using Retrieval-Augmented Generation (RAG), LangChain, and large language models for document summarization, and developed an AI agent that retrieves relevant document segments to answer QA queries.

Centre for Development of Advanced Computing (C-DAC), Project Engineer, Data Science (R&D)

September 2020 - October 2021

Hyderabad, India

Project: Data Analysis Tool for Deep Web, Government of India

- Built a data analysis tool spanning over 20 modules to process structured and unstructured data, and improved code performance using in-process parallelism and multiprocessing.
- Enhanced language processing by implementing text transliteration, Named Entity Recognition (NER), and an offline language translation Python API using an open-source model.
- Applied image and video analytics techniques, including face detection, cropping, and face matching, for multimedia analysis.
- Dockerized the Python codebase to streamline deployment, automation, and scalability.

Tech Driven Basic (TDB.ai), Computer Vision Engineer

February 2020 - August 2020

Indore, India

Project: Invoice Automation for a US-Based Healthcare Firm

- Trained a deep learning model to automate manual invoice data entry, using SSD and Faster R-CNN for multi-object detection in images.
- Extracted invoice information through OCR using Pytesseract, storing structured data in CSV files and databases.
- Used Labelling for image annotation and regular expressions for data processing and validation.
- Built the detection pipeline on Google Colab using OpenCV for accurate multi-object detection.

EDUCATION

School of Data Science and Forecasting, DAVV University

2018 - 2020

MBA, Business Analytics (Data Science) · GPA: 8.2/10.0

Rajiv Gandhi Prodyogiki Vishwavidyalaya

2014 - 2018

Bachelor of Engineering, Computer Science · GPA: 7.3/10.0

CERTIFICATIONS & AWARDS

Certifications

- Generative AI Fundamentals, Databricks (2024)
- Career Essentials in Generative AI, Microsoft and LinkedIn
- Customer Analytics
- Industry 4.0
- Digital and Data Foundations: Cloud, Technology Platforms and Cyber Security

Awards

- Champion, Cultural Catalyst, PwC (May 2025)
- Inspire, Cultural Catalyst, PwC (May 2025)
- Super Employee Award, KPMG India (2023)
- Rising Star Award, KPMG India (2022)
- Excellence Award, C-DAC Hyderabad (2021)
- Arctic Code Vault Contributor, GitHub (2020)
